TITAN JACKETED UNDERGROUND STORAGE TANK

The Titan Tank is a structurally superior steel tank bonded with the Space Age developed Molecular Weight Polymer. Every Titan Tank is equipped with an internal 2" monitoring port near one end of the tank. Installing contractors will be rewarded with lower cost of installing this Titan Tank. This tank is #1 in overall value.

Locations

Denver, CO 303-296-4800
Colorado Springs, CO 719-475-9440
Grand Junction, CO 970-245-0144
La Salle, CO 970-284-7942
Casper, WY 307-234-0870
Salt Lake City, UT 801-973-9055
Albuquerque, NM 505-345-4577
Phoenix, AZ 602-415-3394
Lube & Lift Division 303-537-7664

FEATURES:

- Patented, Heat-Fusion Bonding Process
- UL58 Listed Tank
- Complies with EPA Regulations
- Interstitial Monitoring Well
- High-Impact Resistance
- Minimum of 125mm thick Polyethylene w/ UV Protection
- Multiple Compartments Available

BENEFITS:

- Polyethylene with a high chemical resistance to a wide spectrum of products at a broad range of temperatures.
- PEA GRAVEL BACKFILL NOT REQUIRED
- CATHODIC PROTECTION NOT REQUIRED
- Inner tank is structurally sound and compatible with today's modern fuels
- Double wall protection reduces liability costs and worries.
